A7800 Wireless Keyboard/Mouse Set
Quick Guide

Turn On/Off the Power of the Optical Mouse Automatically:

Auto-sleeping mode and power-saving function will be activated if the mouse is not working within a long time. Press any key or scroll wheel to activate.

LOW POWER INDICATION

When the power is low, the intelligent power indication light on the keyboard turns to RED and starts blinking.

NOTE ON HANDLING BATTERIES

• Keep batteries out of children's reach.
• Do not mix old and new batteries or use different types of battery.
• Replace old or weak batteries promptly.
• Dispose of and recycle your old batteries in accordance with local regulations.

TROUBLE SHOOTING

If the keyboard and/or mouse doesn't work after installation:
• Make sure you've correctly connected the receiver to the computer; i.e., properly plugged in to one of the computer's USB ports.
• Make sure the batteries are installed correctly.
• Make sure the distance between the keyboard/mouse and the receiver is no more than 10 meters.

If the mouse cursor doesn't move properly, or if the keyboard doesn't allow you to type on the screen:
• Make sure the receiver isn't too far away.
• Make sure there are no large metal devices in the proximity — such as microwaves, electric stoves, televisions and hair dryers — which may be be interfering the receiver's radio reception.
• Check the status of the batteries.
